

What are the hazards? Who might be harmed...	...and how?	What are you already doing?	Suggested actions to be taken to further control risks?	Action by who?	Action by when?	Actions completed?
Snow sports and use of tow						
Falling and collision with ground objects and people	Skiers Tow Operators Hikers	Contact / impact with people, fences, pylons, rocks, buildings, ice, hard and soft snow resulting in physical injury.	Adopt and display FIS skier code of conduct. Provide warnings - on website, to signs, verbal by tow operators. Padding on appropriate pylons. Mark unusual snow hazards where practicable - high visibility hazard fence and snow paint available. Tow operators wear high visibility and marked jackets.	Check and display Skiers code. Update operating rules procedure to include slope check and display of signs.	Raise Team	Yes
Using main tow and hit or dragged by hanger button	Skiers Tow Operators	Contact/impact with ground resulting in physical injury	Observant tow operators Warning signs Tow operator verbal advice on how to use Tow slowed for less experienced users Emergency stop buttons	Adding remote tow controls	Raise Team	
Portable tow use	skiers	can't exit tow caught in rope glove or hand slipping on rope trip on rope	observant tow operators stop tow Emergency stop buttons belt has quick release don't run in bad visibility warning before use tow has safety trip mechanical stop skiers can only use the tow with our manufactured belts	new signage		
Using lower portable tow and hit or dragged	Skiers	Contact/impact with ground resulting in physical injury	Observant tow operators	Adding remote tow controls	Raise Team	

			Tow operator verbal advice on how to use Warning signs				
Adverse weather - cold, wind, snow - surface conditions	Skiers	Hypothermia, frostbite, increased risk of falling and collision with ground, objects and people	Operator monitors and has final say on closing tow				
	Tow Operators	Hypothermia, frostbite,	Checking weather forecast Advance information using communication channels Appropriate clothing Rota Close tow when appropriate				
Noise	Tow Operators	Harm to hearing	Only enter engine hut for duration necessary to perform task and wear ear defenders	Update operating rules procedure	Raise Team		
Broken, frozen or sliding hanger	Skiers	Contact/impact with hanger or ground resulting in physical injury	Annual repair maintenance and replacement				
	Tow Operators						
Damage or mechanical breakdown of the tow	Skiers	Slips, falls, dropping tools from height, tow operated when being repaired resulting in physical injury	Operator reviews and has final say on closing tow	Update operating rules procedure	Raise Team		
	Tow Operators						
Derailment of cable and subsequent pylon repair work	Tow Operators	Slips, falls, dropping tools from height, tow operated when being repaired resulting in physical injury	Operators trained in pylon and cable work				
	People underneath		Operating procedure rules Stop tow Tow lock out Use of safety harness Communicate with members to assist or stay clear If in doubt operator may close the tow				
Work Party Activities							
Maintenance work	Workparty members	Briefing before each activity					

		Select appropriate team members - check training and experience					
		When appropriate nominate person to manage helpers and bystanders					
Ladder and pylon work	Workparty members People underneath	Falling Dropping tools from height	Isolate tow with lock out Keep people clear underneath Experienced team Helmets available Buckets and rucksacks available to carry tools when required Ladders footed	Banksman Harness and lanyards Register of safety equipment and correct storage	Raise Team		
Paint and grease	Workparty members	Harm to skin	gloves				
Flaking paint during wire brushing	Workparty members	Harm to skin Harm to eyes	gloves goggles				
Electrical shock	Workparty members	Shock or death	Electricians to carry out all electrical work				
Fence repairs - slips, trips, use of hammers, pliers, posts, rolls of fence	Workparty members	Sprains, bruises, cuts	Brief on hazards and how to complete tasks Buddy helpers with experienced team members				
Carrying loads - timber, fencing, tools, spares, equipment	Workparty members	Sprains.	Appropriate weight loads				
Engine hut - noise, hot exhaust, power tools, heavy and sharp objects, oil, grease, diesel fuel, 1st floor access	Workparty members	Sprains, bruises, cuts, burns, falling, harm to eyes, skin, hearing	Remove superfluous materials each year. Bunded diesel tank Ensure ladder is hooked to bracket Ear defenders required if spending prolonged time in hut when engine is running Power tools to be used only by trained operators Signage	explore practicality of guarding exhaust	Raise Team		
Fire	Workparty members	Burns or death	Fire extinguishers for appropriate uses with periodic checks
